The University of North Carolina at Chapel Hill Department of Pediatrics – Genetics and Metabolism Open Rank Medical Geneticist

The Division of Genetics and Metabolism in the Department of Pediatrics at the University of North Carolina at Chapel Hill is seeking a Medical Geneticist to join their team. The candidate will join an established team of faculty and participate in the care and management of adult and pediatric patients with genetic and metabolic disorders. This position is full-time, fixed-term/open rank.

The ideal candidate will be board certified/board eligible in Internal Medicine and/or Med-Peds and Clinical Genetics/Biochemical Genetics and is interested in an academic position. The candidate must have strong teaching skills and demonstrate excellent interpersonal skills and the ability to work as part of a team. Responsibilities will include dedicating nearly 85% of their time to clinical activities including outpatient and inpatient care with the rest of the effort devoted to teaching and scholarly activities. The former will involve evaluation and management of adult and adolescent pediatric patients with connective tissue disorders, lysosomal storage conditions, neurodegenerative disorders, and metabolic disorders. The faculty will also be involved in providing services to adult and pediatric patients with hereditary cancer disorders. A track record in working on longitudinal research projects, and scholarly work is desirable.

The current genetics team includes six physicians, six genetic counselors, two metabolic dieticians and two nurse practitioner providers, who work collaboratively in caring for their patients and families with compassion and evidence-based care. We also have an active accredited fellowship training program. Our team works and interacts closely with colleagues from Maternal Fetal Medicine, Lineberger Cancer Center, and Cytogenetics and Molecular Genetic Laboratories. Faculty members in the Division are actively involved in hearing loss research, mucopolysaccharidosis and other LSD translational research, clinical studies evaluating the utility of using next generation sequencing for newborn screening, quality improvement projects and with the birth defects registry.

The North Carolina Children's Hospital is part of a busy quaternary care medical center and a major referral center for children with complex conditions in the state and region. The North Carolina Children's Hospital physicians work hand-in-hand with community hospitals and pediatricians all across the state, providing specialty care to more than 70,000 children from all 100 counties in North Carolina each year.

UNC is a National Institutes of Health (NIH) Clinical and Translational Science Award (CTSA) funded institution that offers support for clinical and translational researchers at all levels. This support includes seed funding, regulatory assistance, data management, drug/device development and grant preparation among other things.

The Triangle area of Raleigh/Durham/Chapel Hill is consistently ranked among the nation's best places to live. The region offers affordable living, a temperate climate, easy access to beach and mountains, vibrant dining, and cultural offerings.

This position requires MD or DO. The candidate must have strong teaching skills and demonstrate excellent interpersonal skills and the ability to work as part of a team.

The ideal candidate will be board certified/board eligible in Internal Medicine and/or Med-Peds and Clinical Genetics/Biochemical Genetics and is interested in an academic position.

The UNC School of Medicine has a rich tradition of excellence and care. Our mission is to improve the health and wellbeing of North Carolinians, and others whom we serve. We accomplish this by providing

leadership and excellence in the interrelated areas of patient care, education, and research. We strive to promote faculty, staff, and learner development in a diverse, respectful environment where our colleagues demonstrate professionalism, enhance learning, and create personal and professional sustainability. We optimize our partnership with the UNC Health System through close collaboration and commitment to service.

OUR VISION

Our vision is to be the nation's leading public school of medicine. We are ranked 2nd in primary care education among all US schools of medicine and 5th among public peers in NIH research funding. Our Allied Health Department is home to five top-ranked divisions, and we are home to 18 top-ranked clinical and basic science departments in NIH research funding.

OUR MISSION

Our mission is to improve the health and well-being of North Carolinians and others whom we serve. We accomplish this by providing leadership and excellence in the interrelated areas of patient care, education, and research.

Patient Care: We will promote health and provide superb clinical care while maintaining our strong tradition of reaching underserved populations and reducing health disparities across North Carolina and beyond.

Education: We will prepare tomorrow's health care professionals and biomedical researchers by facilitating learning within innovative curricula and team-oriented interprofessional education. We will cultivate outstanding teaching and research faculty, and we will recruit outstanding students and trainees from highly diverse backgrounds to create a socially responsible, highly skilled workforce. Research: We will develop and support a rich array of outstanding health sciences research programs, centers, and resources. We will provide infrastructure and opportunities for collaboration among disciplines throughout and beyond our university to support outstanding research. We will foster programs in the areas of basic, translational, mechanistic, and population research.

Interested candidates should submit an online application at https://unc.peopleadmin.com/postings/260420 and include a current CV and a cover letter addressed to Arti Pandya, MD MBA, Associate Professor and Pediatrics-Genetics and Metabolism Division Chief.
